

Beckman Group Teams up with ISS to Host a Non-Invasive Optical Imaging Workshop

CHAMPAIGN, ILLINOIS—May 14, 2003—ISS, Inc., the Illinois-based designer and manufacturer of scientific and biomedical instrumentation, will be sponsoring a pre-conference workshop at the Society for Psychophysiological Research's 43rd Annual Meeting in Chicago this fall.

To be held on October 29, at the Hyatt-Regency Hotel, the workshop will cover non-invasive techniques for optical imaging from theory and method to current applications.

The University of Illinois' Cognitive Neuroimaging Laboratory (CNL) is organizing the event. The CNL is co-directed by Gabriele Gratton, M.D., Ph.D., and Monica Fabiani, Ph.D., and is a part of the University of Illinois' Beckman Institute.

Topics to be covered during the one-day meeting are:

- Principles of Optical Imaging and Methods of Measurement, Enrico Gratton, Ph.D., University of Illinois
- Hemodynamic Optical Imaging in Animals, Ron Frostig, Ph.D., University of California-Irvine
- Fast Optical Signals in Animals, John George, Ph.D., Los Alamos National Laboratory
- Hemodynamic Optical Imaging in Humans, Maria Angela Franceschini, Ph.D., Tufts University and Massachusetts General Hospital
- Fast Optical Signals in Humans, Gabriele Gratton, M.D., Ph.D.; University of Illinois
- Applications of Optical Imaging to Psychophysiology, Monica Fabiani, Ph.D., University of Illinois
